

Set Up Instructions

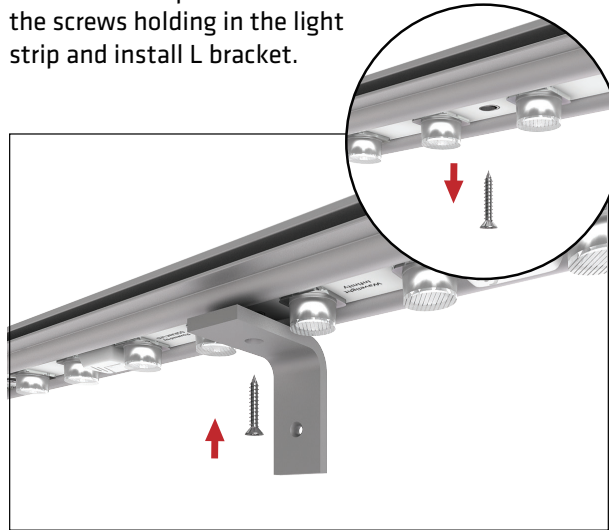

DNA WALL MOUNT

DNA-P-F02

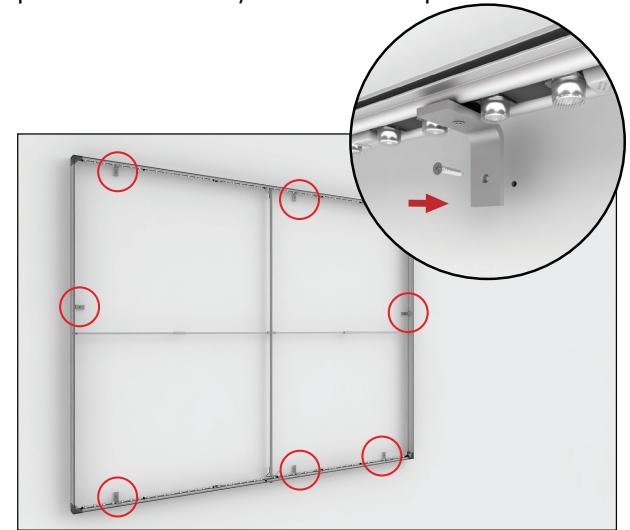

Step 1: Assemble the frame of the DNA model you have chosen.

Step 2: Count the number of L brackets you have. Determine the placement of the brackets and remove the screws holding in the light strip and install L bracket.

Step 3: Install frame onto the wall using the appropriate hardware for your wall make up.

Step 4: Test the electrical to make sure light box is working properly. Attach graphic print in the 4 corners working your way to the center of the frames.
